BOORED AGAIN. THE EVENING WORLD made another scor

ing hit in the Sporting Extra last night.

Like the "Giants," it opened the League season by whitewashing its rivals. It was arst on the street with the report of the game at Washington, and contained besides a variety of other fresh and exclusive news.

Buy the Sporting Extra of THE EVENING World and you will get the latest reports of all games and races.

Deputy Warden OSBORNE, an official of attested ability and honesty, has been promoted to the Wardenship in place of Fatty Walse, and is given a salary befitting the responsible position.

THE WORLD denounced the appointment of WALSH as one unfit to be made. It exposed his crookedness and inefficiency in the place. It rejoices that its "hounding," as Commisstoner Amperson called it, has brought about so wholesome a change.

An independent and fearless press is an in dispensable aid to good government.

VAIN KICKING.

The moribund Sun now issues an order that the Bridge Trustees " must go."

The offense of these eminent citizens conbists in their unanimous refusal to saddle the taxpayers and the Bridge with a debt of \$7,000,000 to gratify the spleen of Ananias and valuate his mortgaged rookery at the public expense.

It is vain to kick against the pricks, old man. That business is settled. Even were it not, THE WORLD would continue to move on, leaving you and your encumbrances so far below and behind it that they would not be even a source of annoyance.

Do try and die more decently.

If the rivalry which this publication stimulates were an unhealthy one, we should not encourage it. But it relates to the funda mental virtues of punctuality, industry and good deportment, and anything which encourages these is well.

It is probable that the formation of good babits in these matters, in the desire to "stand at the head." will be of as much value to the pupils in after life as anything wise that they learn at school.

Politics are getting to percolate and permeate quite too low down, when the selection of a Chief Justice of the United States is canvassed by its probable effect upon the "vote" of any special class of citizens, native or foreign born. The fittest jurist for that great office should be chosen, without recard to any other question.

CONCLUDED.

[WRITTEN EXPRESSLY FOR THE EVENING WORLD.

HEN the first gray streaks of daylight admonished the pirates that they must be off they departed in such haste that Waddy forgot his overcoat, and it was brought to Capt. Williams by the captain of the Alethea as a silent but unim-

ceachable witness of the Pirate King's guilt. Capt. Williams was not entirely satisfied with the splendid work of that remarkable Sunday, for an important link in the chain of evidence was still missing. The boat which had cut such an important part in the history of the piracy had not been found. He locked his trembling and dejected prisoners in separate cells, doubled the watch and started out to complete his search. After a difficult tramp he found the craft. It was an ordinary working skiff, 19 feet long and would not seat comfortably more than six men. It and been hired by Waddy at 3 o'clock on the morning of the robbery on a pretext of visitng Communipaw on business, but upon reaching the middle of the bay and far snough to be beyond the reach of an outcry, they coerced the boat man by threats of throwing him overboard and with a revolver at his head made him an unwilling accom-

On Monday the pirates were held in heavy bonds at the Tombs Police Court and a few weeks later were put on trial in the Court of General Sessions. The evidence had been worked up carefully, the trial was a brief one, and each of the pirates was sentenced to hard labor in Sing Sing Prison for fifteen years. This sharp detective work and speedy condemnation of the criminals made Capt. Williams a terror to this grade of malefactors, and it was only a short time before he broke up the Slaughter-House Gang, sending most of them up the river on long terms and driving the others from the Fourth Precinct. A BEWARD OF MEBIT.

The faithful barkeeper, whose keen amateur detective work made him such a valuable ally in convicting the Pirate King, was not forgotten. Capt. Williams discovered in him the traits of a good officer, and interesting the then Inspector, William Murray, in his behalf, they had him put on the force as a policeman. He developed into an excellent patrolman and did some splendid work. The Police Commissioners watched him closely, rewarded him for his fidelity, and to-day he is one of the most efficient Sergeants in the department-with every prospect of going still higher.

WADDY TURNS UP AGAIN. About a year ago, while Williams was Cap tain in command of the old Twenty-ninth, but now the Nineteenth Precinct, he was seated in his private room when a man about forty-five years old entered and said :

" Captain, I am tired of leading the life of a crook and I want to be honest. I have tried vainly to get work, but cannot do so, and you know that idleness always drives a discharged convict back to a career of crime. Can you help me?"
The Captain glanced hurriedly at his visitor, struck by what he had said, but failed to iden-

tify him, and said:
"I do not recognize you. What is your name and where have I met you before?"
"Look me over carefully, Captain," said the stranger. "and you will know me. Certainly you could never forget a man like me."

THE CAPTAIN AROSE AND SURVEYED HIS VIS-ITOB CLOSELY.

The Captain arose and surveyed his visitor closely. Time had made great changes in the man. His hair was tinged with gray, his eye had lost its fire, his brow was wrinkled and he was broken down and greatly dejected, but the Captain recognized him and ex-

Great God, you are Waddy the Pirate!

The Captain told him that if he was sincere in his desire to reform and was prepared to work for an honest living he should not be long out of a job, and on the following day he was installed as a laborer on the subway and began digging trenches to receive the wires which are now underground.

THE PIRATE RING'S LAST THEFT. Two weeks later at midnight in dark and stormy weather a small boat containing three men was rowed noiselessly from a pier on the the North River, crossed to the Jersey flats, and at the point of a revolver the captain and crew of a schooner were robbed. The days of river piracy, it was supposed, had ended, and this particular line of work did not seem to the approach to the police. But to fit any man known to the police. But Capt. Williams detected it as the workman-ship so familiar to the police in the seventies, and learned that his penitent ex-convict had

quit his work on the subway the day prior to this act of piracy.

Waddy was arrested and convicted and is in Sing Sing again to serve out a term of fifteen yeass, and should he live to breathe once more the air of freedom will be a prematurely sged man, broken in health and spirits and bankrupt in character and purse. Once he was the Pirate King; but never again will he or his former associates ply their murderous occupation in the Bay of New York.

nature they are determined to make the best of it.

They all feel that it is about settled that their removal will not occur until early winter sets in. There is considerable speculation, however, as to the effect of the change, and upon this subject they are divided.

A few contend that it will revolutionize the entire trade in that section of the town, and that the retail butchers and produce dealers in Washington Market will increase their business thereby. Others say that it will hurt the Washington Market trade.

Many West Washington Marketmen will have a store downtown and a stall in the new market. Rents will go up in consequence and there will be no living.

J. L. Furman, of the produce firm of G. Furman & Co., said to an Evening World reporter: "I think that after we move it will be some time before business will be as good as at the old stand. You see, our trade is divided up among out-of-town shippers, grocers and peddlers or wagon boys.

"The grocers and wagon boys will come right along with us, but the shi pers, who do most all of their trading south of Canal street, as their interests all lie in this part of the city, will probably not trouble themselves to come up where we are for a year or so. I am referring to the produce branch of the market business.

AFTER THE BATTLE. The Trying Period of Convalence and the

ons who have successfully passed the cruss of scute illness, such as Diphtheris, Scarlatina, Typhoid, Pneu nonia and the like, yet die of exhaustion or from a "relapse " during convalescence. Thousands of others, during this period of extreme weakness, have sown in them the seeds of future grave diseases. The whole system is so weak and exhausted that it is unable to withstand any new disease, and if any disease tendency, such as that to Consumption, Paralysis and the like are present, they are almost certain to be brought out and firmly fixed at this period.

We all know, only too well, how often Bright's Disease of the Kidneys follows Scarlet Fever, how Heart Disease appears during convalescence from Acute Rheumatism how often Blindness or Dosfness or Brain Fever super vene upon Merales.

Weakness, exhaustion of Brain and Nerves and lower ing of vital energy being the peculiarities of convalescence that invite disease at this time, common sens teaches us that such patients need a powerful yet gentle and gulatable tonic and brain and nerve food, and it is on this account why Scotch Oats Essence has become so deservedly popular in the weakened state, both in grown people and children, following acute illness.

It seems almost incredible, in view of the most re able tonic, nerve-building and nerve-healing properties discovered in Scotch Cats as proven by its trial in al forms of Nerve, Stomisch and Kidney troubles, that this great secret of nature should have remained so long up We have lately had the pleasure of going over the er

tire factory of the Scotch Oats Essence Company of New York, and must say that their facilities for percolation and extraction are marvels of pharmaceutical art. At their elegant offices at Broadway and Fulton street we were shown over 4,000 testimonial letters, principally from physicians. If the unbiassed testimony of some of our best physicians is to be believed, Scotch Oate Essence is the

greatest medical discovery of the age. It has saved

thousands of children from Bright's Disease and Paraly

Judge Barrett Hands Down His Decision This Morning-He Can't Tell the Exact Amount to be Paid, and Appoints a Referec. With Orders to Proceed at Once-The Decision Indicates the Need of Haste.

Judge Barrett handed down this morning his decision in the suit of the Gescheidt heirs against Col. John R. Fellows, and it was another reverse for the District-Attorney. The suit brought in the Supreme Court

The suit brought in the Supreme Court was by Charles A. Gescheidt against John R. Fellows, to oblige him to pay over \$7,150, with interest from September, 1872, which, it was alleged, Mr. Fellows received as referee in a partition suit and did not pay over.

The plaintiff specifically alleged that Col. Fellows sold the property in question, which was real estate left by Morris A. Gescheidt, and converted the proceeds to his own use.

In his answer to the complaint by the Gescheidt heirs, Col. Fellows admitted that he received the \$7,150 in 1872, but urged that he paid it over in several instalments to one J. D. Reymert then counsel for the Gescheidts, but that the lawyer gave him no receipts for the moneys

then counsel for the Gescheidts, but that the lawyer gave him no receipts for the moneys and afterwards absconded.

The motion before Judge Barrett was to brush aside Col. Fellows's plea that Revmert was responsible for the money and to obtain a judgment against Col. Fellows for the sum received, with interest. It succeeded. Judge Barrett's decision is as follows:

precise sum Mr. Fellows should be required to ply into Course. Moneys which he says he permitted Reymert to take are in theory of law still in his (Fellows's) hands and must be paid over, but I should be sorry to do him an injustice as to even the smallest part of the amount, and upon the whole I think it would be fairer after this great lapse of time to have the amount liquidated upon a full examination before a competent referee who will give Mr. Fellows an opportunity of calling witnesses and proving, if he can, that any part of the Reymert money was paid by the latter to the heirs.

Unfortunately no wouchers or receipts have been produced, and I see no escape from the conclusion that substantially all the money he has received on the two sales must be deposated, with interest. The Judge then appoints Alfred Daven-port referee to fix the amount to be deposited u court by Col. Fellows. The Judge orders he referee to proceed within two days and inish the case without taking engagements of counsel as an excuse for postponement.

St. Augustine April 12, via Hampton Roads Apri 18. Her trip to the South has been a long and pleasant one. She has steamed 5,500 miles on only 176 tons of coal, and for the whole trip has not met with the least mishap. Leaving here Feb. 2, accompanied by his family, Mr. Benedict, in the Oneida, has visited Bermuda, St. Kitt's, Dominique, St. Lucie, Port Spain, Laguayra, Curacoa, Havana and St. Augustine. The Oneida was built for Mr. W. E. Connor and named by him the Utowana. When he sold her to Mr. Benedict he reserved the name, intending to build another and a larger yacht, which he has not yet season's yachting, and is to have a Inew launch of the most improved style. The steam or naptha launch has become a necessity for all large yachts, whether steam or sail, and there is just now a keen Hill and Mayor Thatcher, both of whom have competition between the builders of them, steam written letters expressing their approval of the launch races being now a feature of the season. As yet, none have been able to beat the Herreshoffs in this manufacture, the Henrietta, which that company built for Mr. Monroe, the publisher, having proved pre-eminently speedy. The Electra's launch-also a Herreshoff-is very fast, but Capt. Lowberg has instruction from Mr. Benedict to se cure for the Oneida something a trifle faster than

COMSTOCK TO BE ARRESTED.

Judge Barrett Grants the Application of Hemmens and Shirley.

Judge Barrett this morning granted an order for the arrest of Anthony Comstock, in the action for

the arrest of Anthony Comstock, in the action for \$25,000 damages for conspiracy, brought by John Hemmens and Henry S. Shirley, whom Comstock charged with keeping a gambling saloon at 50 Broadway.

In granting the order Judge Barrett said: ** The papers now presented make a prime facte case, and the order can be granted, as there is no saggestion that the defendants are non-residents of transient persons, and as their responsibility to respond to any damage that may be recovered is not questioned. I think the ball should be modested in the defendance of the served until Monday.

I lawyer Herman Joseph, for the plaintiffs, said that the order would not be served until Monday. The immediate cause of granting the order is that additional evidence was brought by Mr. Joseph, who stated that it was in his possession all the time, but that he refrained from producing it until it was found that Judge Barrett refused to grant the order of arrest upon the evidence given.

Mr. Comstock is very ill at his home in Sammit, N. J. His physician says that he has a disorder of the back of the head.
